

Heritage Series

maestro

empowering wireless

Adaptable, powerful and tailor-made modem

Maestro Heritage combines a base unit offering GSM/GPRS/EDGE technologies in an Industrial grade design with pluggable boards catering for diverse Machine to Machine applications, transforming the Heritage into a Multitechnology Gateway. This modular and scalable design concept also features a powerful operating system offering Download Over The Air capabilities and other unique embedded applications.

Being customizable both in terms of hardware and software, the Maestro Heritage modem is the best tailored solution in direct response to customer needs.

Option boards :

Maestro Heritage base unit will be available with this first series of option boards to serve specific applications.

I/O Board

6+6 digital inputs/outputs, 2 analog inputs, optional analog/digital converter
→ Monitoring and Control

Ethernet Board

allows IP connectivity,
→ Sales & Payment or Home & Security

GPS Board

→ Vehicle Remote Management

On-Demand Customization & Development

Using its embedded Open Platform and Easy to customize option board, Maestro Heritage makes it simple to adapt for any application. Thanks to a dedicated design team, the customer is supported all along the development process of its own board (JDM, OEM design services), therefore enabling him to reduce significantly his solution's time to market.
